

Cold Asphalt Test Data Sheet

Experiment Name		Experiment Results	Specification Limits	Standard
Specific Gravity at 20 °C (g7cin 3)	-	0.96	0.96	TS EN 15326
Viscosity	Saybolt NuroI (21%inm) 2SOC	90	40-200	ASTM D 244
	Kinematic Viscosity 40 (cst) @°C	41.67	2-8	TS 1451 EN ISO 3104
Flash Point (°C)	-	164	100	TS SN ISO 2592
Value	-	-1	+1 a	ASTM E 70

a: If the cold asphalt additive has to be stored, the PH value before and after storage should be +1.

Cold Asphalt is a high-quality, polymer-modified cold mix asphalt available in batch orders to builders, road repair municipalities, business owners, and for the first time, do-it-yourself homeowners.

Features include:

- Guaranteed permanent
- Works in water and ALL weather conditions
- Potholes, utility cuts, overlays, edge repairs, etc.
- Consumer lab tested and approved
- No mixing, no tack
- Available in bulk or bags
- Instantly ready for traffic
